

# Discovering God's World

## February 2018

Mrs. Holtorf & Mrs. Hareldson

### Discoveries

*"In the beginning, God created the heavens and the earth"*

~Genesis 1:1

God has given us the great gift of a curious mind to explore and enjoy the world in which we live.

This month we will learn about magnets and motion. We will see how magnets attract and repel. We will discover what kinds of materials are magnetic and which things are not. We will learn about force. We will see how speed and acceleration work on objects in motion and the effects of friction.

#### Weekly Themes:

Week 1: Magnets

Week 2: Magnets

Week 3: Motion - Force (push/pull)

Week 4: Motion- Ramps/Friction

### In January

-We learned about the 4 seasons and how Minnesota seasons can look and feel different from other states.

-We saw on a globe how the Earth tilts toward or away from the sun and how that creates different seasons. We learned that some parts of the Earth are always cold and others are always warm.

-The students worked very hard making beautiful trees for each of the seasons.

- We saw how little the volume of melted snow was compared to frozen and how dirty it was.

### Announcements

**Carnival:** February 2 from 5:30-8:30

**Cupcake Bake Off-** Bakers wanted- email Cindy or stop in KK office for more information.

**No School-** February 19- Presidents Day
