

Discovering God's World

MARCH 2018

Mrs. Holtorf & Mrs. Hareldson

Discoveries

"In the beginning, God created the heavens and the earth"

~Genesis 1:1

God has given us the great gift of a curious mind to explore and enjoy the world in which we live.

This month we will make up our snow day class on motion. Then we will explore STEM (Science, Technology, Engineering, Math) through two great children's stories. Math, science and engineering are all interconnected and children will play and explore all three as we solve some challenges faced by our story characters.

Weekly Themes:

Week 1: Motion- Ramps/Friction

Week 2: Three Little Pigs (house building /wind)

Week 3: Billy Goats Gruff (bridges)

In February

-The young scientists played with a large variety of magnets as they discovered what materials are magnetic and which are not, the varying strength of different magnets and some practical uses of magnets (magnetic writing boards).

-We learned that we use push and pull every day.

-Students used cars to exert the force of push as they traced numbers on road tracks.

-They played with Gravity as they placed items in tubes in the sensory table.

Announcements:

Channel One cereal drive and pajama day: March 12th & 13th- Wear your pajamas and bring a box of cereal to donate to Channel One.

Easter Eggstravaganza- March 17- register online www.cccrochester.org

No School: March 27th- parent/teacher conferences

Spring Break: March 30th-April 6th
