

# Discovering God's World

## MAY 2018

Mrs. Holtorf & Mrs. Hareldson

### Discoveries

*"In the beginning, God created the heavens and the earth"*

~Genesis 1:1

God has given us the great gift of a curious mind to explore and enjoy the world in which we live.

In May, we will learn what makes an insect an insect. As we explore the world of bugs through play, story, science exploration & art the children will gain a greater appreciation for the many creatures God created.

#### Weekly Themes:

Week 1: What is an insect?/ Ladybugs

Week 2: Bees

Week 3: Metamorphosis/ caterpillars

Week 4: Insect Parts/ Butterflies

### In April

- Children learned about the needs of plants and the important jobs of plant parts.
- We learned how stems act like straws to bring water and nutrients to the rest of the plant.
- We planted some grass seed and we gave them a little haircut as it grew taller.
- The children got to explore seeds to find the baby plants tucked away inside.
- We flew around the garden as bees picking up pollen from one flower and pollinating another.

### Announcements:

Last Day of School: May 23rd

4's Graduation: May 23rd

**Reminder:** We go outside daily (weather permitting). Please label your child's outerwear.
